TECHNICAL SKILLS

Languages: Python, Javascript, C++ , Java

Frontend: React, Nuxt.js, Vue.js, Tailwind CSS, Material UI, Figma

Backend: Node.js, Express.js

Databases: MongoDB, Supabase, IndexedDB

Tools and Technologies: Linux, Git, GitHub, Postman, Docker, Auth0, JWT, REST APIs, Mongoose, Vite

PERSONAL STATEMENT

Software engineer focused on building and understanding systems end-to-end, with strong experience in JavaScript, Python, and modern web stacks. Comfortable working across frontend, backend, and developer tooling, with hands-on experience refactoring large codebases, improving performance, and contributing to open-source projects.

EXPERIENCE

Economize, Inc. | Software Engineer Intern

Sep 2023 – June 2024

- Built backend features for **dynamic cost-savings recommendations** at project and organization level.
- Migrated **10,000+ lines** of Nuxt.js code from Options API to Composition API.
- Upgraded and refactored the Resources site to **Nuxt 3**.
- Implemented **25+ components/pages** during a full-site revamp.
- Contributed to **5+ cloud cost tools**, including AWS/GCP calculators.

PROJECTS

Dockerite | [Github Repo Link](#)

Nov 25 – Dec 25

- Built a tool to simplify Docker-based development workflows and environment setup.
- Abstracted complex Docker operations for managing containers, images, volumes, and logs.
- Worked with Docker internals, container lifecycles, networking, and Linux systems.

Summer | [Github Repo Link](#)

Nov 25 – Present

- Built a minimal HTTP server from scratch to understand TCP connections and request parsing.
- Implemented routing and custom middleware chaining to manage the full request lifecycle.
- Focused on correctness and extensibility while exploring web framework internals.

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering)

2024-28

Campus: Chennai | Bachelor's enrollment: B.Tech, Vels Institute of Science, Technology & Advanced Studies

ACHIEVEMENTS & EXTRACURRICULARS

Active open-source contributor: Shipped **15 merged PRs** with **2 under review** across **Mathesar, Hugo, Material UI, and Portainer**, working in large, widely used repositories.

Promptrepo Hackathon Finalist – Co-developed *Docspect*, an AI-powered document analyzer, ranked among the Top 20 out of 88 teams.
